

Gesell Testing at CCK

Christ Church Preschool & Kindergarten (CCK) requires Gesell testing as part of our kindergarten application process. We are fortunate this year to have Cherie LaFollette, former CCK Fours lead teacher and former CMS kindergarten teacher, conducting our testing this year during school hours at no cost to our current families. When you apply for our kindergarten program, please indicate at the bottom of the application form if you give permission for Cherie to complete the Gesell testing requirement during school, and she will schedule each child's testing with the Fours teaching team during the month of January. If you would like to have your child tested prior to January, please contact Jenny Beaumont, Cherie DuPuy or Debbie Starling directly to schedule testing after school hours. There will be a fee to do early testing.

Overview

The Gesell Developmental Observation-Revised (GDO-R) is a comprehensive, multi-dimensional assessment system that assists educators and other professionals in understanding characteristics of child behavior in relation to typical growth patterns between 2½ to 9 years of age. It uses direct observation to evaluate a child's cognitive, language, motor and social-emotional responses. Your child's performance will correspond to a Performance Level Rating (Age Appropriate, Emerging or Concern) and the GDO-R will result in a Developmental Age.

The results of the GDO-R provide information to both parents and teachers regarding a child's educational needs. This shared information portrays the child's strengths as well as areas that may need additional support. The results provide a teacher with a greater understanding of the child's Developmental Age, which then provides direction for differentiated instruction.
